Where restaurants lose orders THE PROBLEM

01

40 to 150+ orders by hand

Most UAE restaurants take 40 to 150+ orders a day on WhatsApp, and every reply is typed by staff.

02

Peak hour pile ups

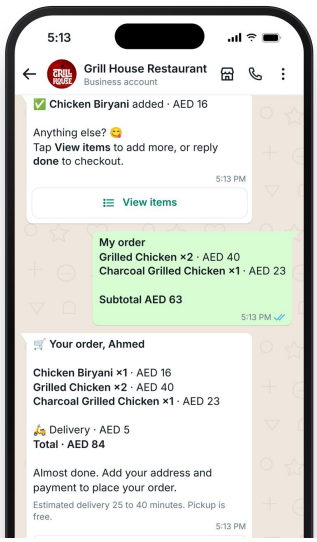

10 to 20+ order messages can land at once. One person cannot answer them all, and every wait risks a lost order.

03

Calls and chats together

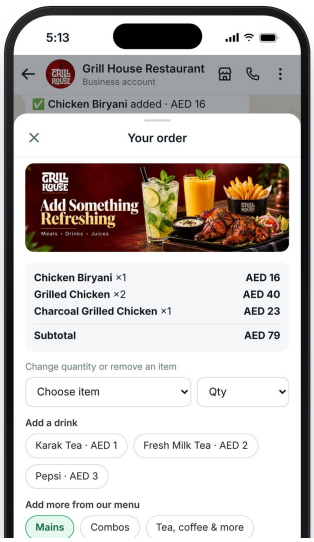

Phone orders ring in while the chat is full. Retyping everything also means wrong items and wrong addresses.

What your customer sees FIRST MESSAGE TO ORDER

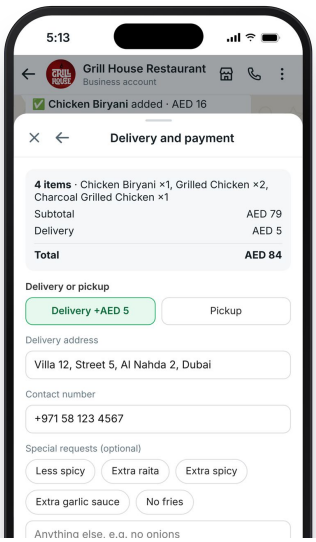

01 Order summary

Itemised cart with delivery fee and total.

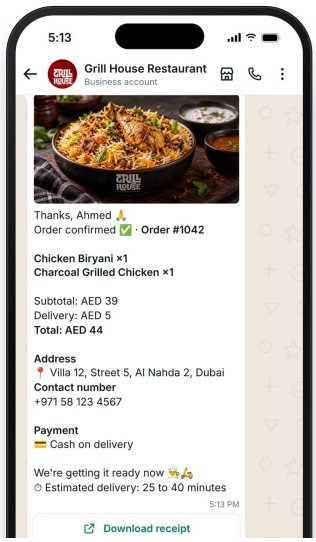

02 Review, add a drink

Change quantities or add more in one screen. No dead ends.

03 Customise and pay

Address and phone autofilled. Less spicy or extra sauce in one tap.

04 Confirmed in seconds

Order number, itemised receipt and delivery time, sent instantly.

What the agent does

Tap, or type it all

Customers can type the whole order as usual. The AI detects it, they confirm in one tap.

Customise any dish

Less spicy, extra raita, no fries or a note in their own words. One tap, never stuck.

Your team can still reply

Staff reply from the same WhatsApp number whenever needed.

Details autofilled

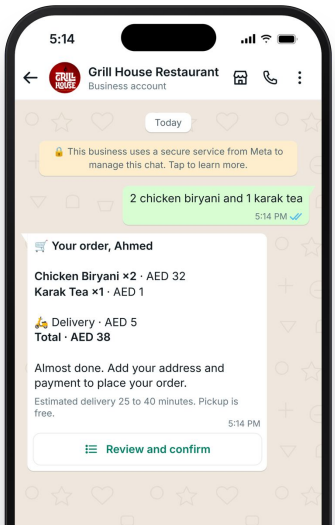

Address and number come pre filled. Regulars reorder in one tap.

Straight to your POS

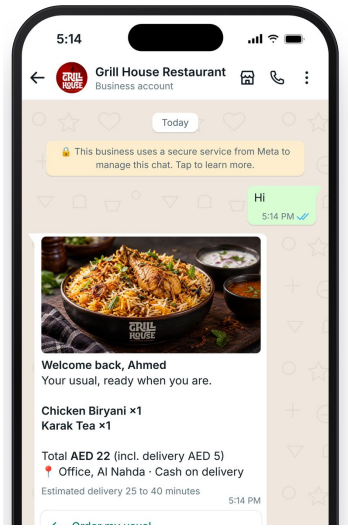

With an API, confirmed orders appear in your POS and kitchen screen.

Maintenance included

Dish and price changes are handled for you, built around your restaurant.

Types the whole order, the AI reads it

Regulars reorder in one tap
